Routine growth & morphology inspections
Sample staining differentiation
Proliferation analysis
Stem cell passaging

Fluorescent cell analysis (tagging, IHC, probes - ISH)
Multichannel fluorescence imaging
Transfection efficiencies
Time-lapse studies

Unlike other systems, EVOS combines all aspects of a digital inverted microscope workstation into a single, compact device that turns on with one switch and can be mastered in minutes. Whether you’re capturing images for publication, teaching or researching, EVOS microscopes are EASIER, SMARTER AND FASTER.

Cell Culture & Maintenance

Microscopy in Minutes

Routine & Complex Experiments
