

# microman<sup>®</sup> E

**NEW** Positive-Displacement Pipette  
for viscous, volatile, and problem liquids

## Full range of Volumes

Model	Part Number	Volume Range	Price
M10E	FD10001G	1 - 10 $\mu$ L	\$350
M25E	FD10002G	3 - 25 $\mu$ L	\$350
M50E	FD10003G	20 - 50 $\mu$ L	\$350
M100E	FD10004G	10 - 100 $\mu$ L	\$350
M250E	FD10005G	50 - 250 $\mu$ L	\$350
M1000E	FD10006G	100 - 1000 $\mu$ L	\$350

## New Full Line of Sterilized Capillary Piston Tips

Model	Part Number	Volume Range	Tips per Box	Price
CP10ST	F148413G	1 - 10 $\mu$ L	192	\$88.00
CP10ST	F148313G	1 - 10 $\mu$ L	960	\$377.00
CP25ST <b>NEW</b>	F148712G	3 - 25 $\mu$ L	576	\$255.00
CP50ST <b>NEW</b>	F148713G	20 - 50 $\mu$ L	576	\$255.00
CP100ST	F148415G	10 - 100 $\mu$ L	192	\$88.00
CP100ST	F148315G	10 - 100 $\mu$ L	960	\$377.00
CP250ST <b>NEW</b>	F148714G	50 - 250 $\mu$ L	576	\$255.00
CP1000ST	F148180G	100 - 1000 $\mu$ L	182	\$88.00

## What's New?

- QuickSnap tip fitting
- Improved handle shape
- Volume-securing switch
- Larger push button
- Easy-to-read volume

New **QuickSnap tip fitting** for easy & instant tip application!  
MICROMAN® E is the only positive displacement pipette as intuitive and simple to fit as regular pipettes and tips.

**Repositioned volumeter** — an enhancement from classic MICROMAN, volume setting can be read on front of pipette, for easy view while aspirating and dispensing.

**New Volume-Securing Switch** allows for easy volume adjustment and minimizes the risk of accidentally changing volume during pipetting!

New **Improved handle Shape** with extended hook allows pipette to rest in the hand comfortably and securely.  
Larger **Push Button** provides easy access and better control.

### What are air-displacement pipettes?

#### Three things to remember

- 1 Recommended for aqueous samples and for general laboratory work.
- 2 Always have a cushion of air (dead volume) between the pipette piston and the liquid sample.
- 3 The piston is a permanent part of the pipette.

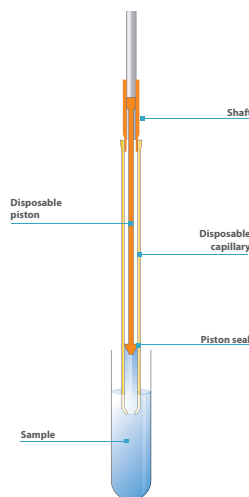

Air-displacement pipette

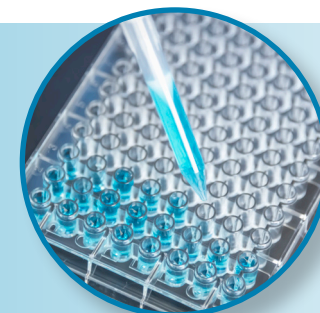

### What are positive-displacement pipettes?

#### Three things to remember

- 1 Recommended for problem samples (viscous, dense, volatile, radioactive, corrosive).
- 2 Direct contact of the piston with the sample (no air cushion).
- 3 Disposable piston (not a permanent part of the pipette).

Positive-displacement pipette

## What can I pipette?

With MICROMAN® E, you may pipette everything you do with a standard pipette, PLUS:

- Oils
- Glycerol
- Blood
- RNA/DNA
- Radioactive samples
- Cosmetics
